U.S.-Hong Kong Service Opportunities

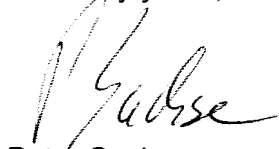

Dear Ms. Beard,

Our company depends on Federal Express for International time-definite express service. Therefore, we wholeheartedly support FedEx's application to obtain additional frequencies for service to and from Hong Kong. These new rights will allow FedEx to expand its service within Asia as well as between Asia and Europe.

Specifically Federal Express will be able to offer later cut off times and provide increased capacity for heavy weight express and freight shipments. Granting FedEx these rights will allow our company to operate more efficiently as well.

With our increasing business between China and Europe it is of utmost importance to rely on fast and effective means of transportation, especially referring to the FedEx system. This expanded service would comply with our customer requirements for short reaction times and positive response.

Sincerely yours,

Peter Sachse
