

This objection is in regard to the proposal provided by Corporate Airlines to serve Jackson, TN with service to St. Louis. I strongly object to my tax dollars being used to subsidize flights that I believe the Jackson flying community neither wants nor will use. Flyers out of Jackson have a history of not supporting small Jetstream turboprop aircraft for the short 20-minute trip to Memphis. They will definitely not support them for an hour and 15 minute ride to St. Louis. As a weekly flyer out of Jackson, I strongly urge the DOT to reject this proposal and solicit others. Frankly, if you can afford to pay Corporate Airlines \$2,139,438 a year then pay the money to Northwest Airlines which already has larger planes and service to a much closer and better equipped airline hub.
